

## 5th Grade News- November 6-10th

The 4th/5th Glow Dance is this Friday! Remember not to get on the bus on Friday after school if you're staying for the dance. Wear a neon color so you'll GLOW! There will be some time available for students to get ready before the dance.

### Math-

In Math, We are multiplying fractions by whole numbers. Next week we will be working toward comparing fractions by comparing the better deal at a store for a given product. Practice on IXL for finding equivalent fractions, since that will help with our next leg of this unit.

### Science-

What's a mixture? What's a solution? What's the difference? Can solutions and mixtures be separated? This week we will find out during science! This is our last lesson before we begin studying for the unit assessment.

### Language Arts-

In Language Arts, we will start with doing some compare and contrast. From there, we'll be doing writing work with the Venn diagrams that we make. 5th grade will be working heavily on sentence and paragraph structures. We're looking for capitals, punctuation, grammar, spelling, and legible handwriting.

### Social Studies-

We will complete our Mission Flags and continue to meet more Spanish missionaries. We will also begin our Project Based Learning this week by making a brochure to convince other colonists to come to your colony. Lastly, we will begin to learn about the first English colony in North America, Jamestown.
